

ARGONNE NATIONAL LABORATORY

700420

December 19, 1972

Dr. Patricia W. Durbin
Lawrence Radiation Laboratory
University of California
Berkeley, California 94720

Dear Pat:

I include a copy of a memo from Stehney to me, summarizing the conversation he had with you last week.

We will contact Dr. Waterhouse regarding the hospitalization of the three Rochester people. Before doing so, I would like to hear from you as to your conversations with her last week, etc. Please write or give me a call; then I'll have Pat Failla contact her, and we will give her the go-ahead.

In the meantime we'll look into the possibility of exhumations of the other cases.

Thanks for the records; anytime you want to get more involved let us know.

Sincerely yours,

R. E. Rowland, Director
Radiological and Environmental
Research Division
